

# Practical Considerations for Cognitive Disorders Post-Stroke

## Content Summary

The Practical Considerations for Cognitive Disorders Post-Stroke module is largely based on Module 12 of the Evidence-Based Review of Stroke Rehabilitation (EBRSR). The module reviews current evidence related to the presentation of cognitive disorders. It also addresses the implications for providing care to individuals who experience cognitive disorders. The EBRSR can be found at [www.ebrsr.com](http://www.ebrsr.com)

## Target Audience

This module is targeted at front-line health providers. However, all staff involved in stroke care may benefit from the information. Participation of all team members will facilitate interdisciplinary implementation of the recommendations. It is helpful to have therapy staff attend the session and assist participants to apply their learning outside the classroom.

## Learning Objectives

On completion of the session, the participants will be able to:

1. List nine types of cognitive impairment post-stroke.
2. State the impact of each cognitive impairment on daily function.
3. Name four tools used to assess cognition.
4. Identify two key differences in the presentation of delirium and cognitive impairment.

## Format

- ✧ Power point presentation with speaker's notes
- ✧ Educator's summary
- ✧ Module sign-up form
- ✧ Module agenda
- ✧ Participant survey form
- ✧ Poster of key points
- ✧ Reference list

## **Auxiliary Materials and Activities**

For this module, suggestions for teaching aids are listed in the speaker's notes of the presentation at relevant points. The poster of key points may be distributed to participants and/or put up in the facility to reinforce the information.

## **Evaluation**

For education program evaluation purposes, we request your assistance with the following:

1. Upon completion, please submit to Diane MacPherson, APSS Administrative Assistant, the following information: title of the learning module, date, and number of participants, by email to [dmacpherson@hsf.ab.ca](mailto:dmacpherson@hsf.ab.ca)
2. Please send the Participant Evaluation Form(s) to:

Gayle Thompson, RN MN
